GAMA-1
TECHNOLOGIES

ENABLING SCIENCE & DATA TO BENEFIT HUMANITY

We leverage our strengths in digital transformation and secure high performance next-generation enterprise technologies to enable the science behind future customer missions.

CORE CAPABILITIES

SCIENCE DATA MANAGEMENT & DIGITAL TRANSFORMATION

GAMA-1 leverages a documented and repeatable cloud architecture and data life-cycle framework for transforming legacy enterprise services into reliable, scalable, economic, and location-independent cloud-based and on-premise enterprise computing services to integrate, disseminate, and warehouse critical mission data for actionable insights and decisions making.

ENTERPRISE SOLUTIONS

Enterprise Solution design starts with your Enterprise Mission. To help you accomplish your critical missions we craft economical, streamlined, flexible, sustainable information technology solutions that are targeted to today's and tomorrow's enterprise objectives.

CYBER SECURITY

Cyber Security is no longer just a good idea; it's an enterprise-wide, foundational principle. GAMA-1 provides system life-cycle threat analysis, design principles, execution, and ongoing compliance monitoring and intrusion surveillance to ensure systems and data are yours, not theirs.
IT OPERATIONS & MANAGEMENT

Operations and Management lives at the intersection of systems and users. GAMA-1 builds systems to be maintainable and usable, and we deliver the knowledge resources to sustain those systems and transparently serve the enterprise.
SOFTWARE & SYSTEMS ENGINEERING

GAMA-1's Software and Systems Engineering disciplines are infused with institutionalized Quality Management System best practice policies and procedures for repeatable, measurable, and continuously improved system development and execution.

PRIME CONTRACTS & CORPORATE GROWTH

GAMA-1's notable growth is just beginning.

We are committed to your mission. GAMA-1's growth has been fueled by our commitment to customer partnerships. Our commitments have been recognized and valued, and our partnerships enable GAMA-1 to take part in ownership of our customers' missions and visions.

NWS NIC
NWS transition of the National Ice Center (NIC) networks, applications and IT support from NSO to NCEP; system administration services to maintain and enhance NCO IT system security.

NWS IDPIS
NWS Mission-critical system administration support to increase the reliability of the IDP infrastructure and overall performance of the applications and services on the systems.

NWS FISMA & ISSO
NWS Federal Information Security Management Act and Information System Security Officer Support Services.

NESDIS CLOUD BPA
Subject matter expertise to support cloud architecture and cloud development for a NESDIS pilot PaaS and IaaS sandbox.

NESDIS ASSISTT PLAIT
Connect STAR science formulation and development endeavors to transition the science software into operational scientific applications.

NESDIS ASSISTT T4
Provide R2O services at NOAA NCWCP for the Center for Satellite Applications and Research (STAR).

NESDIS OSIS
NESDIS OSGS Operational Secure Ingest Service (OSIS).

OCIO EPAAS
Design and develop an Enterprise Platform as a Service (EPaaS) to support NOAA's Corporate Services.

NESDIS CSB SAVM - NMITS TO
NESDIS Security Architecture and Vulnerability Management Support Services.

OCIO ITSS2
NOAA SDD Information technology support services for facilities served by SDD.

NWS Office of Dissemination Cloud Support Services
NWS operations and maintenance system monitoring, metrics, and security services for the Office of Dissemination cloud environments.

NESDIS SME Cloud Development & Innovation
Support enhancement of existing NESDIS Common Cloud Framework capabilities, migration of legacy capabilities, implementation of cloud equivalent capabilities and provide infrastructure management using DevOps & Agile SAFe.

NESDIS ASCSS
Provide a common service to enable science team transition to cloud; science team application development; development and transition to operations processes; and development and implementation of infrastructure to improve the transition to operations processes.
