

ENABLING SCIENCE TO BENEFIT HUMANITY

We leverage our strengths in digital transformation and next-generation enterprise technologies to enable the science behind future customer missions.

• Public Sector
• Migration Services
• Competency

AI & DATA ANALYTICS SERVICES

Using Artificial Intelligence (AI) and Machine Learning (ML) techniques, our Chief Data Officer and Data Science Engineers work with the enterprise stakeholders as they tackle data management, integration, dissemination, warehousing, and governance to manage the complexity of critical mission data for actionable insights and decision making.

CLOUD MIGRATION SOLUTIONS WITH AWS

GAMA-1, as an Advanced Tier AWS Partner, with migration services competency and public sector designation maintains technical proficiency and proven customer success in complex migration excelleration projects of different technical scopes to help our customers move successfully to their preferred cloud platform.

CYBERSECURITY

We provide platform-agnostic security solutions to protect organizations from cyber threats, with experience in supporting Security Operation Centers for real-time threat detection and incident response. We establish zero-trust data governance processes that secure data from theft, corruption, and unauthorized access while ensuring its accessibility to authorized users.

CLOUD SERVICES

Our team collaborates with Federal customers to deliver cloud strategy and migration development using cloud-native solutions, application design and development, DevOps, information security, and smooth transitions to the cloud. Our excelerated methodology follows proven best practices, software development, and security processes.

GAMA-1 is deeply committed to your mission. Our growth has been driven by strong customer partnerships, which have been recognized and valued over time. These partnerships enable us to share in the ownership of our customers' missions and visions, working together toward mutual success.

"We aim to be the trusted partner for stakeholders by leveraging our expertise in digital transformation, earth observations, and applied science. Our mission is to enable science and manage data to benefit humanity through innovative solutions, supported by a culture of continuous learning and adaptability."

- Gustavo Gamarra, President

ENTERPRISE SOLUTIONS

GAMA-1 is highly experienced in bringing a full range of system planning, design, development, testing, operations and maintenance, troubleshooting, and security vulnerability management. Our engineers, administrators, and technicians use this experience in implementing mission-enabled enterprise-wide systems for our federal government clients.

IT OPERATIONS & MANAGEMENT

Our team understands the complexity of the inter-related programs, policies, and technology within the Federal market. Our approach to supporting federal customers in system administration and engineering is founded on our ITIL and CMMI service delivery best practices.

ENVIRONMENTAL INTELLIGENCE

Our team works closely with Federal customers by providing secure infrastructures enabling the collection, processing, archiving, dissemination, and analysis of environmental data. Also, we transition scientific software applications from research to operations across the organization.

SOFTWARE DEVELOPMENT & SYSTEMS ENGINEERING

Our team of certified professionals provides complete support throughout the entire development, operations, and maintenance lifecycle to federal customers who rely on business systems and applications to achieve their missions.
